Product description

Ageing and Temperature Control: The CPF110B1 cellar reproduces the storage conditions of a natural underground cellar to carefully preserve your vintages until their peak date. Protection against light, self-regulated humidity, air renewal, absence of vibrations and constant temperature are combined to guarantee the optimal ageing of your great wines. Depending on your needs, you can adjust the cellar settings to bring the wine to temperature and create up to 3 temperature zones.

Equipment and Presentation: Side LED lighting on either side of the cabinet enhances the collection without disturbing its ageing. Displayed on sliding steel wire shelves with wooden front, the presentation of the wine is optimized. The lateral presentation of the bottles is called "label view" and allows you to enhance the labels of your collection and facilitate the identification of the wines. In addition, the edge of the shelves is designed with a notch to place labels and optimize the storage and organization of the wines.

SLIDING SHELVES

Access easily to your stored bottles thanks to telescopic rails

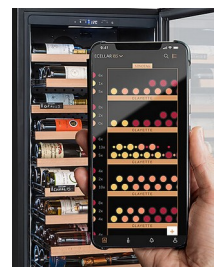

SIDE LED LIGHT

Improves visibility of your wine selection with interior side LED lighting (top to bottom of the cellar)

LABEL VIEW SHELF

For a highlight of your wine selection with a better visibility of the labels

VINOTAG COMPATIBLE

Free wine cellar management application. Access a virtual representation of your cellar and a detailed inventory
