Samsung accessories for SMART Signage & LED Signage

Enhance your displays with a fully integrated solution

Samsung's wide selection of accessories and peripheral devices for SMART Signage and LED Signage ensure the highest quality performance while meeting the wide range of needs of today's businesses. Official Samsung parts and components have been developed for guaranteed reliability and provide the ideal display experience from planning to installation and maintenance.

Using the right accessories and peripheral devices is crucial for proper installation. While components behind and under displays aren't always visible, they are vital to ensure displays deliver the most impactful content possible both for positioning and long-term reliability.

Samsung provides a wide variety of accessories to improve and expand the use of its powerful digital displays. Official accessories from Samsung ensure proper compatibility and components that have been tested and proven for use in a wide range of installation locations and orientations. Samsung products are backed by years of positive feedback from actual users to guarantee high performance and high reliability. Samsung parts and devices are easy to use with quick assembly and are designed specifically to ensure maintenance of Samsung SMART signage is as simple as possible.

SMART Signage player box

Stand

As demand for more captivating UHD content has increased, so too has the desire for simple, easy-to-use solutions. However, installation, programming and managing content and devices can be a time-consuming task. With Samsung's player box powered by embedded SSSP(Samsung SMART Signage Platform) solution on Samsung SMART Signage, displays are able to showcase high-quality content thanks to the powerful Tizen operating system. This eliminates the need for additional media players and switchers through a streamlined, all-in-one design that is efficient, saving time and money. The player box also allows users to manage content and hardware performance from anywhere, simply and easily.

Features

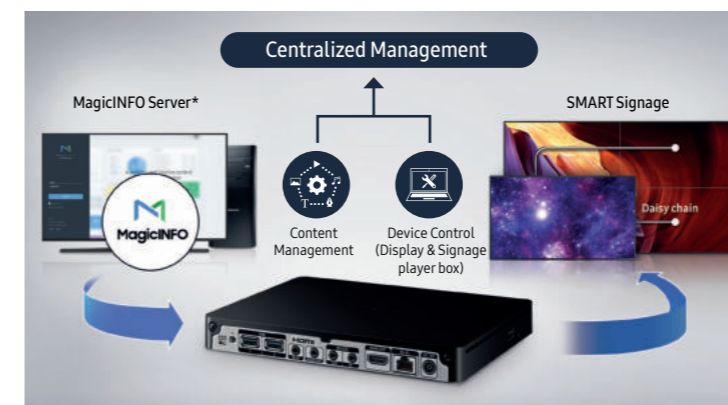

Seamless UHD content delivery

Samsung's UHD Signage player box produces high-quality content with minimal operational burden. Backed by the powerful Tizen operating system, the Signage Player Box can deliver UHD images across video wall configurations as large as 5x5 in size, with a complementary option to provide uniform FHD resolution content within configurations up to 10x10. This versatility allows the Signage Player Box to bridge a smooth, centralized server-to-display exchange free of bulky and expensive external media players and devices.

Intuitive all-in-one operations

For added operational simplicity, Samsung's UHD Signage Player Box condenses often-disparate information processing, content management and source switching tools into a single platform. The Box additionally offers extensive connectivity, including HDMI, DP1.2, DVI and USB content ports, with external PCs and media players to conveniently expand content introduction possibilities. This integration not only ensures a clean and intuitive installation, but significantly reduces users' equipment and setup expenses.

Fully-integrated performance management

For added flexibility, Samsung's UHD Signage Player Box's centralized management platform provides detailed visibility into content and hardware performance throughout an entire daisy chain, allowing users to view and adjust critical display settings anywhere and at any time. Likewise, partners can develop and upload customized apps through the Samsung SMART Signage Platform(SSSP) to control direct operations across all connected displays at once, rather than having to adjust each one individually. The result is a more convenient, flexible management process that makes it easier for users to share content with target audiences.

Wall mount

Businesses today require a wide range of reliable display installation options for various wall sizes and orientations. Samsung wall mounts are versatile and support a variety of SMART signage from small VESA displays to wall-mounted WM65R display, all featuring lasting durability and flexible functionality.

Not only does Samsung's wall mount make installation easier, it also enables easy dismantling for maintenance or other business needs. A slim, highly stable mount for any wall installation, Samsung wall mounts are a perfect fit, every time.

Features

Wall mounting flexibility and stability

The WMN4070SE, WMN4270SD and WMN4277SE are wall mounts for multiple use and offering variable depth when the display is pushed in or pulled out. The mounts also include swivel options. This enhanced flexibility provides a sturdy wall mount and the optimal viewing angle for any environment.

Versatile wall mount capabilities

The WMN8200SF and WMN9500SD are designed for large displays over 75 inches. These are highly versatile wall mounts that provide solid support for standalone and video wall configurations. The slim profile and post-installation cable inset capability allow for clean and easy cable management and offer a clutter-free display area.

Slim and configurable for video wall displays

Specialized for video wall displays and configurations, WMN-46VD and WMN-55VD wall mounts make setup easier, delivering a perfect fit without unnecessary measuring and providing freedom to create single landscape displays, multi-panel portrait walls or massive 10 x 10 video walls. These wall mounts also enable easy upkeep by allowing individual cabinets to be replaced or removed for maintenance with an intuitive push and pull action without having to dismantle the entire video wall. They also allow for vertical front and rear micro adjustments.

No gap wall mount with high durability

The WMN-WM65R is a wall-mounted option designed for the WM65R display. Built to leave no gap between the wall and product, the mount makes installation easy thanks to its separated structure and light weight. The mount further enhances the WM65R display's beautiful aesthetic and harmonizes in any environment while leaving minimal marks on the wall behind.

Stand

Samsung's SMART Signage stand is an efficient tool supporting a wide range of products from Samsung's lineup from FHD to UHD signage including the WM55R display. Available in designs for a wide range of uses, the Samsung SMART Signage stand firmly supports displays on a flat surface and is easy to install for quick, convenient set up.

Features

Reliable and easy-to-set up stand

The STN-L3240F, STN-L4655E, STN-L4355F and STN-L6500E come as two separate stands that can be easily attached to the back of the display using VESA mount holes. Each stand is designed with Y-shaped feet for convenient placement and stability.

Enhanced slim design

The Samsung stand for WM55R offers the ability to customize and work within your ideal writing setup. Users can leverage the optimized pivot height to automatically align the WM55R to an ideal level. The ergonomic 4.5-degree tilt in portrait mode provides a more natural writing angle. Users can also configure the display in portrait or landscape orientation to maximize available writing space. The slim stand features four wheels for convenient relocation, positioning and storage and also offers increased working space in front of the display. Its enhanced, hinge assembly structure enables easy setup and efficient stocking.

LED Signage accessories

With flexibility for various sizes and immersive visuals, demand for LED Signage has grown exponentially. As users seek the best possible Samsung LED Signage options for their business, it's important not to overlook key elements such as a powerful controller and reliable installation frame.

For the best installation and viewing experience possible, Samsung offers its own frame-kit and an advanced S-box featuring an integrated content management solution. Samsung's frame-kit provides an easier setup experience with enhanced magnetic structure and thoughtful clean design. A deco frame covers all four sides of an LED Signage for enhanced aesthetics and Samsung's jig also makes installing LED cabinets on the frame-kit easier while providing a simple way to measure each component, making the installation process seamless. Samsung's accessories are designed to make assembly and maintenance of Samsung LED Signage simple and easy.

Accessory Kit

LED Signage S-Box

Samsung's LED Signage S-Box is a powerful controller capable of meeting the requirements for high resolution content up to 8K using the Multi link HDR feature. The S-Box enables higher brightness and stunning visuals. With the eco-image enhancer, it is able to deliver an eye-catching visual experience while saving power along with an all-in-one integrated content and device management solution, MagicINFO. Samsung's S-Box unleashes the full potential of LED Signage for the user and the viewer.

Features

Streamlined UHD content delivery

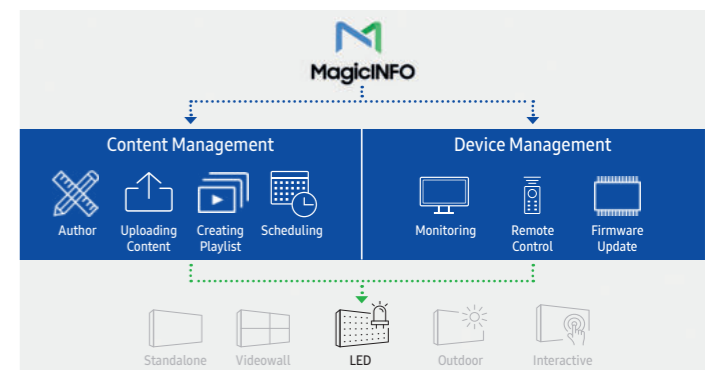

Samsung's LED Signage S-Box condenses the delivery of content to a single, centralized device. The S-Box transmits UHD content across multiple LED Signage without requiring external boxes or a splitter. By streaming content output, the S-Box helps businesses enjoy faster activation.

Eco-image enhancer and Multi-link HDR

The S-Box enhances details by increasing contrast ratio even for low-light images. As a result, the S-Box realizes better picture quality while using less power. Supporting content up to 8K with HDR quality and flexibility for any screen, Samsung LED Signage with Multi-link HDR technology delivers a more immersive display in higher resolution than ever before.

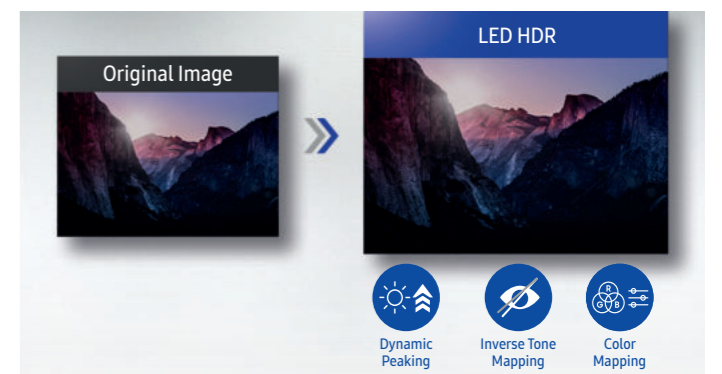

*Multi-link HDR is only supported for SNOW-1810U (SBB-SNOWJMU)

Integrated content and device management

The S-Box is compatible with Samsung's MagicINFO platform*, enabling businesses to create, schedule and deploy content across an entire display network. Beyond content management, users can also manage a range of displays simultaneously through MagicINFO, reducing costs and operational burden.

*Samsung MagicINFO license must be purchased separately

Brilliant and realistic picture by HDR technology

During content transmission, the S-Box applies LED HDR technology for more detailed text and imagery. The S-Box elevates peak brightness nearly two times higher than the standard LED specifications and optimizes gradation and brightness within each individual scene to prevent visual inconsistency. The S-Box supports HDR10+ which dynamically tweaks displays' brightness performance and optimizes image quality scene-by-scene to match content.

Frame-kit

Samsung offers a variety of frame-kit options, each designed to work with specific LED Signage to ensure the perfect viewing experience regardless of the number of cabinets used or the location of the display. Samsung's frame-kit ensures a sturdy mount so LED cabinets can stand the test of time. It can also be used for larger LED Signage installations by combining multiple frame-kits together, ensuring a great looking display, no matter the size.

Features

Enjoy a clean, hassle-free installation

Samsung's LED Signage design produces a uniform installation across any setting or wall height by overcoming gaps between frames or cabinets. A specialized Direct Mount Kit offers users hooks to connect each individual screen. Users in turn can slide and mount each screen to the frame in a simple motion, rather than requiring a more laborious nail- or screw-driven process.

Ensure a compact activation with high durability

Regardless of the environment, the sleek design of Samsung's LED frame-kit ensures seamless adherence without requiring an extra wall or backdrop installation. Together, the frame and screen account for 90 mm* of space, ensuring compliance with Americans with Disabilities Act (ADA) protrusion regulations. Not only does the frame-kit allow for a compact look, it also provides a robust structure that is built to last and won't degrade over time.

*Depth of IF012J-E and IF012J equals 99.4 mm

Expand display composition possibilities

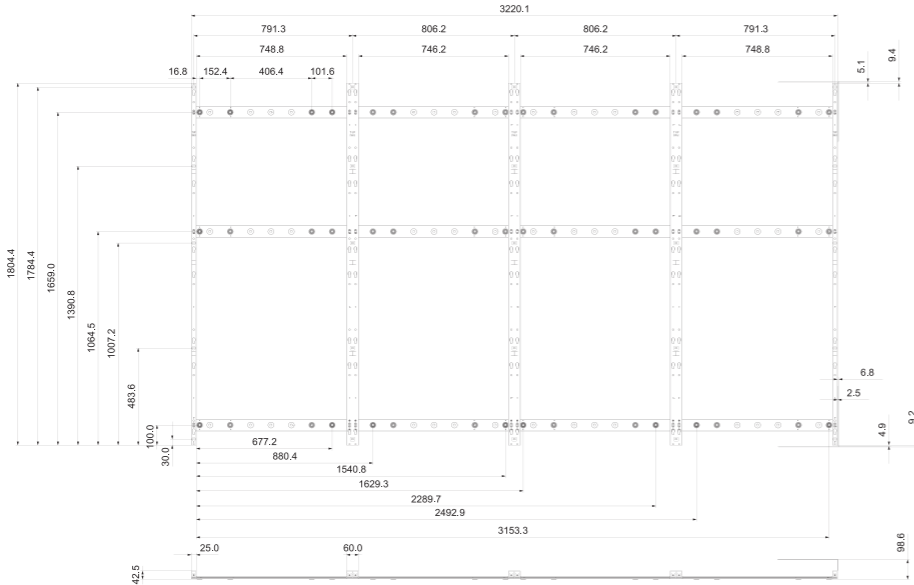

Samsung offers a wide selection of frame-kit options from super fine pixel pitch to specialized shapes and structures. Each is developed to meet the specifications and provide a seamless fit for every Samsung LED Signage. The LED Signage advanced design includes both inclined and ceiling mounted* configurations with Samsung frame-kit guaranteed to catch audience eyes. Additionally, businesses can install LED Signage as a L-shape design**, opening new engagement possibilities regardless of environmental constraints.

*Inclined and ceiling installations are only possible with the IFH-D and IFH-DL series.
 ** L-shape installations are only possible with the IFR-F and IER-F series.

Samsung empowers users to bring their displays to life with deco frame, designed to enhance any screen aesthetically with a variety of color and texture options. Simple and easy to install, and developed with ventilation in mind, users can make their display even more beautiful.

Features

Infinite design

LED Signage seamlessly blends into its surroundings with the Samsung's deco frame* that keeps the focus on what you want the viewer to see. The deco frame is designed to make LED Signage ideal for any setting and the sleek design harmonizes with any room. The deco frame provides a clean and aesthetic look with a modern design no matter the viewer angle.

*Deco frame is only available for IWJ, IWR and IFJ series.

Easy installation

Designed using a magnetic fixture and supporting structure, users can effortlessly enhance their display with a decorative frame around all four sides of the LED Signage. To avoid any ventilation issues, the frame also allows heat in and out on the bottom and top sides for maximum reliability.

*Customization is only available for the IWR Series and must be provided by a third party

Users can accurately measure the placement and position of their display using jig, ensuring easy installation and maintenance no matter the requirements. Due to jig being a magnetic tool, front access and installation is also made easier with the ability to simply attach and detach to the cabinet module.

Features

Easy maintenance through front and rear access

For added flexibility, Samsung LED Signage offers front* access to critical signage components. This expanded visibility further drives clean installations free of catwalk space and ensures closer adherence to neighboring surfaces. Similarly, Samsung LED Signage fosters more convenient, quick-turn maintenance by making rear display components accessible without removal or disassembly.

*IWR / IWJ / IER / IER-F / IFR / IFR-F series: Front access is only available. IFJ / IFH-D / IFH-DL series: Power supply and main board can be accessed from the rear, or from the front on a cabinet level

The accessory kit includes all required equipment for installation including seam adjustment and maintenance such as module replacement of IWR/IWJ model LED Signage. The accessory kit is consist of useful tools for simple assembly, safe dismantling and configuration in order to provide seamless LED Signage experience consistently.

Features

Expand display composition possibilities

Samsung's official accessory kit provides all the tools needed for complete and seamless installation and maintenance. Each item has been selected to provide precision and safety specifically for IWR and IWJ LED Signage cabinets. By using Samsung ceratified tools, users can increase efficiency of work during installation and routine maintenance with easy-to-use features that prevent damage while ensuring a continued high-quality visual experience from the LED Signage.

Components (Continued)

Cover protection

The cover protection is the tool for cabinet protection based on the size of each LED cabinet. This tool helps prevent damage to the edges and corners of the display when installing and dismantling cabinets by putting it on the cabinet.

Edge protection V/H

When only partial edge protection of a cabinet is needed, The edge protection V/H allows the user to add protection just to the vulnerable sides, making it easier to work on the display.

Magnet jig

LED cabinets are secured with magnets at each corner. The Magnet Jig assures safe secure attachment and detachment on either side of the cabinet.

Suction handle

Designed specifically for the IWJ model, this attaches directly to the surface of each module when needing to physically move a cabinet, allowing for safe and convenient movement without damaging the display.

Components

Gap tool

The gap tool is placed between the cabinets to create sufficient space while dismantling or performing maintenance on cabinets, providing a reliable and safe space for work.

Adjustment tool

When utilizing the gap tool for disassembling or performing maintenance on a cabinet, this adjustment tool helps move the cogwheel structures located on the sides of each cabinet for easy disassembling and reassembling.

Plier

Provides easy removal of the cable connecting the board and power supply inside the cabinet when replacement is required.

Gloves

Gloves are provided to prevent fingerprints and other marks, leaving the screen clean during installation or other required maintenance.

Module separate jig

This tool is designed for the IWR model only. This tool attaches to the cabinet surface, and allows for safe and easy disassembly and movement cabinets.

* This model is developed only for IWR model, in addition to CY-WJRPWP which has the 'module separate jig' along with all components from CY-WJJPWP. Please refer to the below components table.
